

EVOLVEN

Driven. Persistent. Innovative.

Launched in 2007 and headquartered in Jersey City, New Jersey, privately held Evolven was created with one purpose in mind - to help customers mitigate configuration and change risks threatening the stability, compliance, and security of their IT environments. In 2024, Evolven still remains the only vendor to meet this challenge head-on, delivering critical data and insights necessary for IT teams to meet modern demands.

As a pioneer of Configuration Risk Intelligence, Evolven automates configuration and change controls across complex, hybrid environments, including on-premises and multi-cloud. Evolven's platform efficiently gathers extensive configuration data from IT applications and infrastructure, both on-premise and in the cloud. By employing AI-based analytics, it identifies and ranks risks associated with misconfigurations and actual granular changes across the entire IT landscape. This allows for the prevention and quick resolution of issues affecting stability, compliance, and security, ensuring a robust, compliant, and secure IT environment. AI-based insights provide the needed clarity and context to close the loop on IT processes, such as detecting unauthorized changes, configuration drift, and inconsistency, determining the true root cause, stopping risky code delivery, identifying certificate expirations, verifying policy compliance, and more.

With over 200 years of collective experience working with large and regulated enterprises, Evolven's leadership team combines the passion for helping customers with our proven expertise in delivering IT solutions and results. Anchored by executives from IT operations, cybersecurity, cloud, and compliance sectors, this accomplished group offers diverse skills for driving results and innovation.

United by an unwavering commitment to client success, the leaders at Evolven direct all efforts toward tangible outcomes from our teams and our offerings. This relentless mantra has contributed to Evolven becoming a trusted partner for IT operations, ITSM, DevOps, SRE, and SecOps teams in some of the largest, most heavily regulated, and most complex organizations worldwide.

"THEY HAVE DEMONSTRATED TO MY SENIOR LEADERSHIP TEAM THE PARTNERSHIP...I CAN'T SAY ENOUGH ABOUT EVOLVEN! IT'S A COMPANY UNLIKE ANY OTHER I HAVE EVER WORKED WITH."

Joining Forces to Ensure Success

Evolven is committed to building strong partnerships with our clients, prioritizing their satisfaction. To further this commitment, we collaborate with leading global and national system integrators, leveraging their established relationships and expertise as needed. This collaborative approach paves the way for success. To learn more about existing relationships, visit our website, or speak with an Evolven account executive.

Pioneers in Configuration Risk

Evolgen is dedicated to one task: pinpointing IT misconfigurations and changes based on risk. This approach reveals the critical data and insights that IT needs to solve modern challenges - but simply hasn't had access to before Evolgen. Our technology helps enterprise IT departments reach new heights in operational excellence, shifting from a reactive approach of always fighting fires to a more proactive stance. We not only enhance efficiency, but automate manual operations and service management steps that drive significant cost savings. This singular focus positions us at the front line, supporting the transformation of ITOps, CloudOps, DevOps, and SecOps with the help of AI.

Evolgen takes pride in being at the forefront of innovation, underscored by our achievement of seven United States patents. These patents are a testament to our distinctive methodology in tackling prevalent challenges in the field. Evolgen is deeply rooted in advanced data science and uses these patents in our Configuration Risk Intelligence platform to prevent and rapidly resolve IT issues arising from misconfigurations and changes.

PATENTS

Below is an overview of our patents, each playing a crucial role in revolutionizing how IT challenges in stability, compliance, and security are addressed:

- 1 Change Collection and Risk Analysis in US20160042285A1:** A System and Method for Analyzing and Prioritizing Changes and Differences to Configuration Parameters in Information Technology Systems
- 2 Value Anomalies in US20180239682A1:** System and method for automated detection of anomalies in the values of configuration item parameters
- 3 Contextual Clustering in US20170195178A1:** System and method for contextual clustering of granular changes in configuration items
- 4 Dependency Mapping in US20190081861A1:** System and method for determining information technology component dependencies in enterprise applications by analyzing configuration data
- 5 Root Cause Analysis from Configurations in US20170213142A1:** System and method for incident root cause analysis
- 6 Change Reconciliation in US11290325B1:** System and method for change reconciliation in information technology systems
- 7 Predictive Change Analytics Automated in US11894976B1:** Change analysis system for determining a risk level for proposed changes in an IT environment.

“DIFFERENT DASHBOARDS CAN TELL YOU THAT SOMETHING HAPPENED WITHIN ITSM, SIEM, OBSERVABILITY, AND CI/CD PLATFORMS, BUT EVOLVEN'S UNIQUE VENDOR-AGNOSTIC VISIBILITY ACROSS THE ENTERPRISE IT ESTATE CAN PROVIDE ONE SOURCE OF TRUTH FOR WHAT CHANGED.”

*Jason English,
Director & Principal
Analyst, Intellyx*

Award Spotlight

Evolgen remains an award-winning market leader. Our recent 2023 accolades include:

- Digital Innovator of the Year - Intellyx
- Top Risk Analytics Solutions Provider - CIO Review
- Hot Company in Configuration Risk Intelligence - CDM
- Best Configuration Management Solution - Global Excellence Award

Contact us to learn how we can help your organization thrive in today's complex IT environments.
